

1189. Maximum Number of Balloons

Easy 737 57 Add to List Share

Given a string `text`, you want to use the characters of `text` to form as many instances of the word **"balloon"** as possible.

You can use each character in `text` **at most once**. Return the maximum number of instances that can be formed.

Example 1:

nlaebolko

Input: text = "nlaebolko"  
Output: 1

Example 2:

loonbalxballpoon

Input: text = "loonbalxballpoon"  
Output: 2

Example 3:

Input: text = "leetcode"  
Output: 0

Constraints:

- `1 <= text.length <= 104`
- `text` consists of lower case English letters only.
